SB says oper- ational potential very high. SB technical officer recommends a one grade pro- motion, in lieu of any cash award. TSD recommends a \$5,000 award. I rec- ommended Panel Members review and that TSD especially see SB and FI comments. This is certainly the type of achievement that deserves a suggestion award. This audio support specialist may also deserve promotion. (Exec- utive Secretary will bring a listing of past significant suggestion award cases for the Panel's reference).</p> <p>25X1C</p> <p>150</p> <p>18 October 1967</p> <p>Referred</p> <p>triggering effect</p> <p>✓ 68-127</p> <p>19 October 1967</p> <p>Referred</p> <p>16 November 1967</p> <p>Improvement on an off design recorder. ████████ marked \$200 - \$300 for intangible benefits, and stated that the annual tangible savings reported by the Station Chief seem valid. TSD recommended award consideration for tangible savings of over \$50,000 reported by the field.

Evaluators conclude this is not of much value. However, there may be a "triggering" effect that might merit a Minimal Cash Award or Certificate.

For review at SP Meeting.

Comments: The suggester developed a Field method of gathering intelligence while Countering Communist Insurgency. The case has been sent to the Assistant Deputy Director for Plans and Director of Training for comment.

The Acting Chief, FE's memo gives much credit to ██████████ for his development. This case appears to require more study and action by Headquarters staffs and divisions. For interim discussion at the March Meeting.
